3. Create an Applet that displays a bar chart of the average temperature of 12 months of two cities. The city names and temperature values should be taken in two ways:

- directly in the code
- using <PARAM> tag in html file

Output should be as follows:

4. Create a class called **MenuFrame** with the following:

- A File and an Edit menu as follows:

<u>F</u> ile	<u>E</u> dit
New	Cut
Open	Copy
-----	Paste
About	-----
Exit	Color RED
	BLUE
	NONE

- For New, Open, Cut, Copy and Paste – output will be shown in the console window.
- About – it will show your name in a message box
- Exit – to quit the application
- Color – background color will be changed accordingly
